

Wondering what is going on in the school grounds? - Kevin Gooch, Principal (8/6/09)

You will have noticed that we have builders on site who are constructing two small teaching spaces to accommodate the 1:15 teacher pupil ratio for children in their first year at school. We are hoping that these new teaching spaces will be ready for use early Term 3, 2009.

The building site work requires the removal of an existing play area at the end of the existing Visual Resource Centre which will eventually be the walkway between the new buildings and the existing.

Some parents have been wondering why a recently constructed concrete low wall, enclosing a raised lawn area, has had to be demolished and reset back by approximately 2 metres. This wall was constructed late last year and was built in the incorrect place. This was a site measurement error overlooked by our planning consultants. Accordingly it has been moved and placed now in the correct place to allow for the construction of a new covered decking and entrance way into the new and existing teaching spaces in this area.
